**ALEKS: Assessment and Learning in Knowledge Spaces**

Math presents students with seemingly endless challenges and opportunities for growth. If you find yourself struggling, personalized assistance is just a few clicks away. ALEKS, an intelligent, Web-based learning system, will assess you to gain an understanding of your math knowledge, then will work with you as your own personal tutor to help you learn topics that you may have forgotten or haven’t learned yet. After you take an initial assessment you will be presented with a pie chart that details exactly what you know, don’t know, and what you are ready to learn next. Your **ALEKS Pie** will be individualized to your specific needs, becoming your roadmap for success in math.

Click on an area of your pie to access topics you are ready to learn and quickly fill any gaps that might otherwise block your success.

What ALEKS Does:

- Tells you exactly what math topics you know and don't know
- Becomes your roadmap for success and provides personalized learning
- Presents you with new math topics that you are ready to learn
- Assists you as your own personal tutor
- Allows you to work on math anytime (available 24/7)

**Specifically for TCU Students:**

Purchase your 6-week access for $30 at [www.aleks.com](http://www.aleks.com). When asked for your course code, enter the appropriate course code from the following two options:

- Prep for *Topics in Mathematics* or *Elementary Statistics* (MATH 10033/10043)  
  **Course Code:** NAFR6-YNRTT

- Prep for *Applied Precalculus* or *Precalculus with Trigonometry* (MATH 10273/10054)  
  **Course Code:** KNPCM-JU4VV
